

LETTER OF RECOMMENDATION

I am writing this letter of recommendation in solid support of Mr Magapu Shanmukha Chakra Govindu Kumar, whom I have had the privilege of knowing for an enriching period of three years. Over this time, I have taken on various roles in mentoring and guiding Shanmukh in his academic pursuits. As Shanmukh's research paper mentor and co-author, I also served as Shanmukh's final-year project guide. In this, I had the privilege of overseeing and supporting his endeavours in translating theoretical knowledge into practical applications.

To begin with, I am pleased to provide insights into his remarkable strengths in technical skills. Notably, while exploring the SHA256 algorithm as part of his final year thesis, he demonstrated a remarkable capacity for grasping intricate algorithms, a feat that necessitated extensive research. His firm grasp of mathematical principles and robust programming skills in Python and Java were evident throughout this challenging project. His work extended beyond theoretical understanding to practical implementation, showcasing his proficiency in connecting both the front end and back end through cutting-edge frameworks such as React JS and Next JS. Additionally, his mastery extends to seamlessly integrating databases, with a particular focus on utilizing MongoDB and Firebase to enhance the overall functionality of the projects. This interdisciplinary approach underscores Shanmukh's ability to bridge the gap between theory and application.

Moreover, during his tenure in the bachelor's program, I had the honour of instructing Shanmukh in two key subjects: "Software Engineering, Database Management, and Operating Systems." In three courses, Shanmukh exhibited a truly exceptional level of academic excellence. His consistent A+ grades in these subjects testify to his dedication, intellectual understanding, and rigorous work ethic. Further solidifying his commitment to academic excellence, Shanmukh's overall degree score of 9.49/10.00 over the entire bachelor's program places him among the top performers in our university. Shanmukh's academic prowess extends to his final year thesis, where he explored the cryptographic algorithm in Blockchain.

Additionally, Shanmukh demonstrated an advanced understanding of CBDC principles, showcasing a depth of knowledge that extended beyond the theoretical to the practical application of blockchain technology. His proficiency in seamlessly integrating blockchain and implementing state-of-the-art cryptographic protocols spoke volumes about his technical understanding and mastery of complex concepts. This collaborative project demonstrated his ability to elevate the user experience through intuitive UX/UI design. The secure and efficient mobile and web application for CBDC transactions that he developed was technically sound and user-friendly. Shanmukh's capacity to navigate the intricacies of CBDC principles while simultaneously delivering an impressive application solution highlighted his analytical skills, creative problem-solving abilities, and a keen awareness of the end-user experience. The success of our CBDC and Application development project was a testament to Shanmukh's ability to approach challenges analytically and implement innovative solutions. Shanmukh's independent task handling, driven by a pursuit of perfection, unintentionally created an atmosphere of potential team sidelining. Additionally, excessive attention to detail occasionally diverted focus from critical project elements. Shanmukh recognizes these areas for improvement, displaying a receptive attitude towards feedback. His awareness of balancing meticulousness with effective team collaboration underscores his commitment to personal and academic growth.

His acknowledgement of the need to balance meticulousness and effective team collaboration is a positive sign, highlighting his potential to evolve as a well-rounded and collaborative academic professional. I am confident that Shanmukh's dedication and receptiveness will serve him well in his future academic journey. I would be happy if he is granted a seat in the master's program at your institution, as I strongly feel that students of such calibre deserve to study at an institution like yours. I would happily answer any query if that can help his admission decision.

Prasenjit K. Das

Dr. Prasenjit Kumar Das
Assistant Professor, Department of Computer Science & Technology
University of Engineering and Management, Kolkata
